Here's formatted/commented (marked FINAL) version. There's something going on with this file in Word that makes it stop responding constantly-very frustrating. There are a couple of comments in here that you can decide if further info is needed. Please check how I titled the figures and make any changes necessary. Otherwise, page layout, headers, footers, and page numbering should be good.

Thank you, Jeff! I have just skimmed because I want Libby to have her review time first, but I think this came together pretty well. We absolutely need to delete Tim's signature before sending forward a draft and it really should not have been included in what was sent to them because it makes it look like he approved it, which he did not. Might want to be clear about this to them – it is not cleared. ☺

Tom – I wanted to get this to you as soon as I could. I think it's pretty much there with the exception of cleaning up the margins, the landscape vs portrait, Table labels, and the like. Basically formatting which I'm not as swift at. Hopefully we're there and this meets your needs.

Tom and Doug – take a look at the distribution list and let me know if that's correct or not.

I will initiate my QA review concurrently so that should help expedite things too. I know Libby will catch my grammatical errors as well.

Jeff
